

EPURAN ALEXANDRU

JUNIOR FRONT-END DEVELOPER

PROFILE

Courteous, hardworking, enthusiastic and great sense of humour. I am interested in IT and everything in its orbit. I recently began to be fascinated by web programming, e.g. developing apps and building websites. I like to code and develop my skills every day I also enjoy working both individually or as a team especially as a team because you know in a team you can achieve great things develop you as a person and learn something new every day I also like to help people when they need without expecting something in return because that's who i am. My goal is to become a full time Front-End Web-Developer because i like to see immediate results of my work.

WORK EXPERIENCE

Printing Machine Operator
GE.GRAF, Bertinoro(FC), Italy
2009-2019

I was a Printer Operator for 10 years printing Books, Magazines, Catalogs, Volumes, Publications, Editorial Series. Every time on a big project planning the strategy with the Production Mannager and the colleagues involved in the project.

EDUCATION

Read, do, read more and learn - with support from a mentor
2020-2021

Starting march 2020 I was mentored by a highly skilled mentor, that has an experience of over 11 years as developer and architect.

Together we came with a plan to understand better the IT industry and in more detail the way JavaScript, and Front-End act. During one to one discussions we addressed items like: how computers, networks, internet, web-apps, browsers come in place to create the digital world. Following a list of materials to read, do, learn - I was able to get into details about **HTML, CSS, JS**, being able to understand the terms that are part of the glossary we have to use daily.

The Informal School of IT
2020

I have attended 5 month course at the informal School of IT and I've learned Web development concepts such as **HTML5, CSS3, JavaScript(ES6)** and **React**. I've acquired knowledge in how to build a responsive website, JS concepts such as AJAX, how to work with an API, OOP, and how to build a functional website. We had weekly projects which where meant to improve our knowledge and practice, also a final team project which was a Movie Website. The project was made in React with an API provided by our mentor, we worked in a team of 3 each one of us had every day tasks to complete. The project contains a Login Page, Register Page stored in local storage also movie pagination, movie search/advanced search, movie details section, add movie, edit movie, delete movie, the movie website is also fully responsive. You can see more on my [Portofolio](#).
